Distributor Program

Product Description

Vanguard SkidGuard / LumaLine nonskid, highly visible, abrasion and chemical resistant pedestrian surface coating kits include everything you need to safeguard all your pedestrian surfaces yourself.

SkidGuard comes in black or yellow. **LumaLine** kits provide all the same features of our SkidGuard liquid plastic, nonskid coating kits, in White, instead of Black or Yellow, with the added feature that **it glows in the dark** when fully charged with a light source!

SkidGuard has a nominal amount of aggregate and glass beads in the mixture, giving the finished product an improvement in nonskid characteristics over the existing surface applied to. SkidGuard's durable, nonskid surface coatings are the most cost effective, longest lasting, high-definition pedestrian and vault coatings on the market today. Perfect for stairs, pedestrian pathway vault lids, or any slippery surface.

Product Description

DisposaCone® is an innovative, temporary, disposable 18-inch tall, fully retroreflective barricade solution that is functional and safe for job sites, maintenance work, emergency situations or public events. Made from renewable and recyclable materials, the product has two butyl adhesive strips on the base that adhere to asphalt, concrete, glass, metal and other hard, dry surfaces. Because of its unique design and engineering, DisposaCone® withstands up to 4 days of wind and rain. After use, it can be recycled with other paper goods. Ships in boxes of 30 DisposaCones or by the Case (8 boxes).
